User Guide

System: Pallegama Stores — Supermarket POS and ERP System **Document:** 02 — User Guide for Testers
Version: 1.0

This guide shows you how to use the system. Read it once before you start testing. You can keep it next to you while you test.

> **Tip for the developer:** add a screenshot under each "Screen" heading before you print this guide.

---

1. Words you will see

Word	Meaning
POS	Point of Sale — the till screen where the cashier sells
Cart / Bill	The list of items the customer is buying right now
Barcode	The black lines on a product. The scanner reads them.
Item code	The product's number in the system
MRP	The highest price printed on the product packet
Selling price	The price the shop sells the item for
Cost / Purchase cost	The price the shop paid the supplier for the item
Stock	How many of an item the shop has
Shift	One cashier's working time on the till, from start to end
Opening float	The cash put in the drawer at the start of a shift
Return	When a customer brings an item back
Offline	No internet connection
Sync	Sending offline bills to the main system when the internet comes back
Supplier	The company that sells stock to the shop
GRN	Goods Received Note — the record that stock arrived from a supplier
Loyalty customer	A registered customer who collects points
Tier	Loyalty level: Silver, Gold or Platinum
Voucher	A gift card with money on it
Coupon	A code that gives a discount
Wholesale	A lower price for buying many items

2. Opening the system and logging in

Screen: Login

1. Double-click the **Pallegama POS** icon on the desktop.
2. Type your email in **Email Address**.
3. Type your password in **Password**.
4. Click **Login**.

You will see the **Dashboard**.

> If you see a screen asking for a **Backend URL**, do not change it. Call the developer.

3. The menu

The menu is on the left side. The supermarket menus are under **Smart Supermarket**:

Menu	What is inside
Dashboard	Today's sales and other numbers
POS & Sales	POS Checkout, POS Shifts, Process Return, Offline Sales
Products	Category, Add Item, Set Price, MRP Price Setup, Weigh & Print, Price Labels, Promotional Prices, Product Variants
Inventory	Stock, Low Stock Alerts, Stock Damage, Stock Adjustments, Bulk Stock Adjustment, Stock Transfers, Inventory Audits
Purchasing	Suppliers, Purchase, Direct Supplier Invoice, Purchase History
Customers	Customer Segments
Marketing & Loyalty	Offers & Discounts, Loyalty Tiers, Loyalty Customers, Win-Back Campaigns
Finance	Vouchers, Warranty
Reports	Reports, Sales Analytics
Settings	POS Settings, Service Tickets

4. Starting a shift (cashier)

Do this at the start of the working day.

1. Go to **POS & Sales** → **POS Shifts**.
2. Click **Open Shift**.
3. Type the cash in the drawer in **Opening Float** (for example 5000).
4. Click to confirm.

The shift status shows as open.

5. Selling items (POS Checkout)

Screen: POS Checkout

Go to **POS & Sales → POS Checkout**.

Add an item:

1. Click in **Item Code / Search Product** (or press **F9**).
2. Scan the barcode, **or** type the item code, **or** type part of the name and choose it from the list.
3. If the item has more than one price (MRP), a small window opens. Choose the price with the arrow keys and press **Enter**.
4. Type the quantity in **Qty** (or press **F4** to go there). For loose items you can type decimals, like 0.5.
5. Press **Enter**. The item goes into the cart.

Change or remove an item in the cart:

- To change the price or discount of one line, click on **Unit Price** or **Disc** in that line and type the new value.
- To remove a line, click **Remove**. **Ctrl + Delete** removes the last line.

Customer:

- The sale needs a customer. Press **F5** to go to the **Customer** box.
- For a loyalty customer, type their phone number in **Phone Number (Loyalty)**.

Discount for the whole bill:

- Type it in the **Discount** box, **or** use the quick keys: **Ctrl+1** = 5%, **Ctrl+2** = 10%, **Ctrl+3** = 15%, **Ctrl+4** = 20%.

Coupon or voucher:

- Type the code in **Coupon Code** and click **Apply**.
- Scan or type a gift voucher in **Voucher Code**.

Payment:

1. Under **PAYMENT METHOD(S)**, choose the payment type (Cash, Card…).
2. Press **F6** to go to the amount box. Type the cash the customer gave you in **Cash Received**.
3. Check **Change Due**.

Finish the sale:

- Click **Complete Sale** (or press **F2**). The receipt prints.

POS keyboard shortcuts

Key	What it does
F9 or **Home**	Go to the item search box
F4	Go to the quantity box

Key	What it does
F5	Go to the customer box
F6	Go to the payment amount box
F2	Complete Sale
F3	Give Quote (price list for the customer, not a sale)
F10	Switch between Retail and Wholesale prices
F11	Full screen on / off
F12	New bill (clears the cart)
Esc	Clear the current bill
Ctrl+1 … Ctrl+4	5%, 10%, 15%, 20% bill discount
Ctrl+Delete	Remove the last item

Other POS buttons

Button	What it does
Hold Sale	Keeps the bill for later (for example, the customer forgot something)
Recall Held Sale	Brings back a held bill
Give Quote	Prints the prices without selling
Register Loyalty Customer	Adds a new loyalty customer from the till

The cost price rule

The system **does not let anyone sell an item below its cost**, not even the admin. If a typed price, a discount, a promotion or a coupon would make an item cheaper than its cost, you will see a red message and the item will not be added, or the discount will not be applied.

6. Wholesale price

1. Press **F10**.
2. A window **Wholesale Authorization Required** asks for a **PIN**.
3. Type the PIN and confirm. Prices in the cart change to wholesale prices.
4. Press **F10** again to go back to Retail.

7. Selling without internet (offline)

- If the internet stops, the till shows **"Offline Mode — sales are being saved locally and will sync automatically"**.
- You can continue selling normally. Bills are kept on the till.
- When the internet comes back, the bills are sent automatically.
- To see these bills, go to **POS & Sales** → **Offline Sales**. Each bill shows **Pending**, **Synced** or **Sync failed — will retry**.

8. Customer return

Screen: Process Return

1. Go to **POS & Sales** → **Process Return**.
2. Type the bill number in **Invoice / Reference No** and click **Find Invoice**.
3. The items of that bill appear with **Sold Qty**.
4. In **Return Qty**, type how many items come back.
5. In **Disposition**, choose:
6. **Restock (sellable)** — the item is fine and goes back to the shelf.
7. **Damaged (write off)** — the item is broken and cannot be sold.
8. Type a **Reason for return**.
9. Click **Process Return & Refund**.

9. Ending a shift (cashier)

1. Go to **POS & Sales** → **POS Shifts**.
2. Click **Close Shift**.
3. Count the cash in the drawer. Type it in **Counted Cash**.
4. The system shows **Expected Cash** and the **Variance** (difference).
5. Confirm. You can open **Shift Day-End Summary** and **Print** it.

Cash In / Cash Out: use this during a shift when cash is added to or taken from the drawer (not a sale). Type the **Amount (LKR)** and a **Reason**.

10. Adding a new product (manager)

1. Go to **Products** → **Add Item**. You see a table. Each row is one new product.
2. The **Item Code** fills in by itself.
3. Fill in **Description** (the product name), **Category**, and if needed **Subcategory**, **Brand** and **Unit**.
4. Fill in **Purchase Cost**, **Selling Price** and **MRP Price**.
5. Scan or type the barcode in **Barcode**.
6. To add more products, click **Add Row**.
7. Click **Save**.

11. Changing a price (manager)

1. Go to **Products** → **Set Price**.
2. Find the product with **Find Product**.
3. Type the new **Selling Price**.
4. Save.

The system will not save a price below the item's cost. The box turns red and says **"Can't be below cost"**.

12. Checking stock

- **Inventory** → **Stock** — every item and how many are in stock.

- **Inventory** → **Low Stock Alerts** — items that are running out.
- **Inventory** → **Stock Damage** — record broken or expired items.
- **Inventory** → **Stock Adjustments** — correct a stock number after counting.

13. Buying stock from a supplier (manager)

Go to **Purchasing** → **Purchase**. It has 4 steps:

Step	What you do
1. Purchase Order	Choose the **Supplier**, add products, **Quantity** and **Agreed Price**
2. Goods Receipt	When the stock arrives, type how many came in **Receiving Now**
3. Supplier Invoice	Type the **Supplier Invoice Number** and **Invoice Date**
4. Pay Supplier	Choose **Pay From** and the amount in **Paying Now**

After step 2, the stock of those items goes up.

To see old purchases, go to **Purchasing** → **Purchase History**.

14. Loyalty customers

- **Marketing & Loyalty** → **Loyalty Customers** — list of loyalty customers, their tier and points. Use **Edit** to change name, phone, tier or status.
- **Marketing & Loyalty** → **Loyalty Tiers** — Silver, Gold, Platinum, and how much a customer must spend to reach each one.
- A customer moves **up** to a higher tier automatically when their total spending reaches that tier. They never move down automatically.

15. Reports

Go to **Reports** → **Reports**.

- The first tab is **Sales Summary**.
- Click **Today**, **This Month** or **This Year**, or choose your own **From** and **To** dates.
- You will see **Total Sales**, **Bills**, **Average Bill**, **Returns** and **Net Sales**, and a table with one row per day.

Other tabs: Product Profit, Sales by Cashier/Shift, Stock History, Expiry List, Void Report and more.

16. If something goes wrong

1. Do not close the program.
2. Take a screenshot (press **Windows + Shift + S**) or a phone photo.
3. Write what you did and what happened in the Bug Report (document 05).
4. Tell the developer.
