Test Cases

System: Pallegama Stores — Supermarket POS and ERP System **Document:** 03 — Test Cases **Version:** 1.0

Tester name	Test date	Till / computer
_____	_____	_____

How to use this document

1. Do the tests in order, from the top.
2. Follow every step exactly.
3. Use the products and customers from document **04 — Test Data** (P1, P2, C2…).
4. Write what really happened in **Actual result**.
5. Write **Pass**, **Fail** or **Blocked** in **Status**.
6. For every **Fail**, write a bug report in document **05**, and write the bug number (for example BUG-003) next to the status.

Test types: ✓ = normal use (should work) · ✗ = wrong input (should be stopped) · ◆ = edge case (limits)

A. Login

ID	Type	Test	Steps	Expected result	Actual result	Status
LOG-001	✓	Login with correct details	1. Open Pallegama POS. 2. Type the Cashier 1 email and password. 3. Click Login.	The Dashboard opens.		
LOG-002	✗	Login with wrong password	1. Type the Cashier 1 email. 2. Type a wrong password. 3. Click Login.	An error message shows. The system does not open.		
LOG-003	✗	Login with empty boxes	1. Leave Email and Password empty. 2. Click Login.	The system asks you to fill the boxes. It does not open.		

ID	Type	Test	Steps	Expected result	Actual result	Status
LOG-004	✗	Login with an email that does not exist	1. Type test@nothing.com and any password. 2. Click Login.	An error message shows. The system does not open.		

B. Shift start

ID	Type	Test	Steps	Expected result	Actual result	Status
