Bug Report

System: Pallegama Stores — Supermarket POS and ERP System **Document:** 05 — Bug Report (Problem Report) **Version:** 1.0

Use this when a test **fails**, or when you see anything wrong. Use **one page for each problem**. Make extra copies of the blank page.

How to fill it in

Box	What to write	Example
Bug ID	BUG- and a number. Start at 001.	BUG-001
Test case ID	The test that failed	POS-001
Area	The part of the system	POS Checkout
Title	The problem in a few words	Receipt does not print
Steps	Exactly what you did, one step per line	1. Scanned Sugar. 2. Qty 2. 3. Complete Sale.
Expected result	What should happen (from the test case)	Receipt prints
Actual result	What really happened	Sale saved, but nothing printed
Severity	Critical / High / Medium / Low (see the table below)	High
Screenshot	Yes / No, and the file name	bug001.png
Happens every time?	Yes / Sometimes / Once	Yes

Severity — how serious is it?

Severity	Meaning
Critical	The shop cannot work, or money or stock becomes wrong
High	An important function does not work
Medium	It works, but not correctly
Low	A small problem, like spelling or colour

Status — the developer and tester fill this in

Status	Meaning
Open	New problem, not fixed yet
Fixed	The developer says it is fixed

Status	Meaning
Re-tested — OK	The tester tested again and it works
Re-tested — Still failing	The tester tested again and it still does not work
Not a bug	The system is working as the shop wants
